## **12<sup>th</sup> Multidisciplinary International Student Workshop (MISW 2021) Call for Papers**

### **1. Workshop Purpose**

Tokyo Tech will sponsor the *12<sup>th</sup> Multidisciplinary International Student Workshop (MISW 2021)*, mainly for the graduate students in School of Engineering, School of Materials and Chemical Technology, and School of Environment and Society in order to promote interactions across academic disciplines with overseas exchange students.

### **2. Workshop Outline**

MISW 2021 will be held online on August 5-6, for the graduate students and Asia Oceania Top University League on Engineering (AOTULE) students to encourage innovation across disciplines via a research-based workshop and promote cross-cultural understanding.

Participants are expected to present their own research or a related topic in oral presentation format and attend all sessions at the workshop. To encourage high quality presentations, all presentations are evaluated and awards are given for the best oral presentations. The best presentations from approximately 10 Tokyo Tech graduate students will be selected and invited to attend the AOTULE Student Workshop, which is scheduled to be held online by KAIST in Korea on 8-10 November, 2021. As there are many exceptionally talented students gathering from the Asia-Oceania area, it is a good opportunity for developing friendship, exchanging ideas and so on, through activities such as student workshop. Only graduate students, who attend MISW and are selected, are eligible to attend the AOTULE Student Workshop.

### **3. Workshop Discipline and Theme**

Discipline : Engineering in general

Theme : Leading technology on sustainable development

### **4. Abstract Submission**

Papers from all engineering fields focusing on advanced technology are welcome. Submit the Extended Abstract by e-mail; one page of A4 size, written in English, and PDF format. In this workshop, many young researchers from various engineering fields participate. Please try to make the contents clear so that participants from other research fields can also understand.

### **5. Venue**

Tokyo Tech (online)

### **6. Application Procedure**

#### **1) Eligibility**

Graduate students enrolled in School of Engineering, School of Materials and Chemical Technology, and School of Environment and Society, and AOTULE Students are eligible. Applications from graduate students from other schools and undergraduate students from all departments may be accepted depending on availability within the workshop program (Note: only graduate students in School of Engineering, School of Materials and Chemical Technology, and School of Environment and Society will be the candidates for the AOTULE Student Workshop selection). Approval of the presentation and publication of the Extended Abstract by the student's advisor is necessary prior to submission.

#### **2) Application Deadline**

The application procedure consists of three steps, namely, online Web application entry, receipt of a confirmation e-mail, and then e-mail submission of the Extended Abstract as outlined below. The deadline for Web application entry is **5:00 PM of 2nd of July**, and for submission of the Extended Abstract is **5:00 PM of**

**9th of July.** More information about the application procedure can be found on the MISW website and below.

### 3) Application Procedure

(a) Access the application web-page and fill-in all the items including English test score (TOEIC, TOFEL or IELTS) if English is your second language. The applicant does not have to send the score sheet. The score of two years ago (or more) is also effective.

<https://www.t2form.titech.ac.jp/sv/571786?lang=en>

(b) The applicant will receive a confirmation e-mail.

(c) Prepare the Extended Abstract in MS Word after downloading the abstract template from the MISW website (File Name: 21MISW\_template.doc). The abstract will be published in the pdf form on Tokyo Tech homepage. Please include both text and figures in a single page of A4 size and convert it into PDF file format. The file name of the extended abstract should be saved as described below.

File Name: “Given name” + “\_” + “Last name” + “.pdf”

Example: Taro\_Suzuki.pdf

(d) Send the Extended Abstract by e-mail to the steering committee at the address below.

Contact and Abstract Submission
